

**Related parameters:**

Input/output voltage: DC12V  
 Connecting mode:common anode  
 Product size: 126\*72\*25mm  
 Weight: 220g  
 Output current: <10A/channel  
 Output power:360W

**Characteristics description:**

Using infrared remote control, simple function control one-touch.  
 Has broken the memory function, no need frequent settings.

**Instructions:**

- 1、 Connect the load wire at first,then the power wire;Never connect two wires directly in case of short circuit;
- 2、 According to mode keys to choose the different changing mode every time,when the key is pressed,the effect is changed,function changes have been listed as follows:

Brightness/speed increase	Brightness/speed reduce	Off	on
Static red	Static green	Static blue	Static white
Static rose red	Static light green	Static sapphire blue	3 colors jump
Static orange	Static green blue	Static violet and grey	7 Colors jump
Static light yellow	Static sky blue	Static brown and purple	3 colors gradual
Static yellow	Static cyan	Static purple	7 Colors gradual
